

**KENTUCKY STATE
UNIVERSITY**

AGRICULTURE BUSINESS CONCENTRATION

The Agriculture Business is a degree track under the Bachelor of Science of Agriculture. Students will learn concepts in agriculture business, agriculture economics, and management to be successful in one of the 21.6 million careers in Agriculture, food, and related industries. The degree track is in partnership with the University's School of Business.

Is Agriculture Business the right Option for YOU? If you like working with people, numbers & data, banking, food & entertainment, business & entrepreneurship, manufacturing, plants, animals, farming, marketing, accounting, problem solving, leadership, or communication, a career in Agriculture Business awaits you. This degree is one of the most versatile and employable for professions in the agriculture industry. Agriculture, food, and related industry business professionals build careers across all areas of agriculture and all areas of business.

Agriculture Business students accepted in Kentucky State University's College of Agriculture, Health, and Natural Resources can take advantage of a number of scholarships. Students will also have access to state-of-the-art research facilities, a 300-acre research and demonstration farm, 300-acre environmental education research center (EERC) and a 14-acre aquaculture research facility.
